

# **Homework #5: Money and Crypto**

Econ 590: Current Topics in Macro

Due at 11:59 p.m., Friday of Fifth Week

You may choose one of the following prompts to respond to (only one, please!)

## **Monetary Policy**

Describe the monetary policy path of the last few years (particularly 2020-2023!) and inflation. Graphs and figures are welcome. How has the Federal Reserve performed? In your opinion, what (if any) mistakes have they made?

## **Crypto**

Cryptocurrencies have die-hard supporters, but also a great number of detractors. What is the proper price of Bitcoin (or Ethereum, or any Cryptocurrency of your choice)? If it isn't at that level, why not?
